A more exciting and interesting battle system. :)

I felt like the instructions were clear. The only problem is that I don't play games often which is why I found it difficult to understand... I'm sorry :(Maybe you should focus on why it is important for people like me to play these games, I think that will make your game successful.

I don't like the huge amount of difficult words. :(

Nothing, great job!

Spel is nu nog te veel geluk en te weinig skill van de speler.
